It is issued to individuals who have passed the required knowledge and road skills tests and have met other requirements, such as providing proof of identity and residency. On the other hand, a learner's permit is a temporary license that allows you to practice driving with a licensed driver before you obtain your driver's license. It is issued to individuals who have passed the written knowledge test and vision test, but have not yet passed the road skills test. The learner's permit has certain restrictions, such as requiring you to be accompanied by a licensed driver when operating a motor vehicle. In Alabama, the minimum age for obtaining a learner's permit is 15 years old. Individuals who are at least 16 years old and have held the learner's permit for at least six months may apply for their driver's license by passing the road skills test. Yes, there are specific vision requirements for obtaining a driver's license in Alabama. You must have a visual acuity of at least 20/40 in at least one eye, with or without corrective lenses. If you do not meet this requirement, you may be required to obtain corrective lenses and re-take the vision test. In addition to visual acuity, you must also have a horizontal visual field of at least 140 degrees, or a horizontal visual field of at least 100 degrees with no less than 70 degrees to either side of the vertical meridian in one eye. Additionally, the rental car must have a passenger side mirror for the examiner to use during the test. If the rental car does not have a passenger side mirror, you may be required to bring your own or use another vehicle for the test. It is important to note that you must have permission from the rental car company to use their vehicle for your driving test and you may be required to provide proof of insurance.
