furthermore diagnosing bottlenecks in slow internet/network connectivity. Network Performance Monitor runs an informative dashboard that will help you monitor network availability and response time. WireShark offers a lot of features including: Live capture and offline analysis Standard three-packet browser Rich VoIP analysis Read/write many different file formats Captures file compressed with gzip Description support for many protocols, including IPsec, ISAKMP, Kerberos, SNMPv3, SSL/TLS, WEP, and WPA/WPA2 Multi-platform: Runs on Windows, Linux, macOS, Solaris, FreeBSD, NetBSD, and more Grab Wireshark completely FREE and start analyzing the flow of packages immediately! Official page: Download Link: 4. Whether on a desktop or on non-web applications, as long as you use HTTP/HTTPS for connections, Fiddler can analyze traffic and help determine which causes the heaviest network traffic! Because it is an open source tool, administrators use Fiddler to isolate performance bottlenecks. You can manipulate and record HTTP/HTTPS traffic. One of the main features that PRITG offers` the Dashboard that shows complete information about which applications use the most! bandwidth, and how much network traffic causes in a quick and easy layout. Basically, EtherApe and WireShark offer the same characteristics, but they differ in the representation of data. WireShark WireShark Å` a widely used network protocol analyzer that allows you to monitor every detail on the network and the flow of packets that pass through it. Å was converted to Windows as Windump. Kismet In this time when wireless networks are in high demand, Kismet can marvel at sniffing packages, as Å© Å` was developed specifically for wireless networks. We have compiled an extensive list of the best software and package search tools to use in the activities` daily network administration. Å can also detect and resolve lower network performance issues. There's a bit of a learning curve, for Å², and its not almost intuitive like other programs in this list. Download Free below to get started! 3.3
