Have you ever had to reset a smartphone to default values? Google will request the password after resetting them, and for those cases where it is unknown, FRP Bypass helps you bypass it. The app to avoid Android FRP Protection Google Factory Reset Protection is a patch developed by Google for Android Lollipop that acts as additional protection in case someone loses their device, as it requests Google's user password after the process is completed. This FRP protection is very useful, as long as you know the password. Delete all accounts associated with an Android device with FRP Bypass. To reset a phone to default, you need the credentials that were used to set the phone the previous time: email and password. Therefore, if you found a phone and not its own owner, forgot your password, or if you want to sell some device to buy another, disabling Factory Reset Protection (FRP) is the only viable option to regain its use. If you find yourself in one of these situations, you can download this APK, and with the help of your computer and a USB cable, access the file that will verify the FRP bypass. On the Internet, you can find different guides and ways to do this. By this way, this application is meant to be used legally. I mean, don't even think about using it on a stolen cell phone, but nobody was thinking about doing it, right? The APK FRP is also known as the FRP bypass tool is used to bypass Google factory reset protection. If you have forgotten your Google account password after a factory reboot, it is helpful. You can use the FRP bypass method shared in this guide to solve all your problems. In this article, we will share all the things about the FRP Bypass APK. As you know, many users this problem and want to know how to bypass Google factory reset protection on your Android device. Google Factory Restart Protection is a new patch developed by Google that protects the user's device in case they lose it. This tool is very useful at the time you Restart the factory android and forget the password of your Google account. So keep reading this guide to know more about this tool and how to use it. What is Google FRP bypass apk? As mentioned above, Bypass Factory Reset Protection is a security patch developed by Google. It helps protect the device in case it is stolen or lost. Nobody will be able to avoid frp because you will need access to the Google account. The FRP bypass function was first introduced for devices such as LG, Samsung and many others. Without a doubt, it is an impressive safety feature, but creates a lot of problems if you forget the password of your account. FileNameFRP bypass.apk file size 1.2 MB File type Application / VND.Android.Package-Archive file downloads 69 526 755 version 2.0 Click here to download Easy FRP bypass APK FRP BYPASS APK: Google Factory Reset Protection Facultely all Android smartphones and tablets running Android 5.0, meet this security patch. To avoid the Android FRP block, two guides are available. You just have to follow the simple steps for bypass frp. Mainly with this guide, you will be able to elude the FRP Google block easily, if you have lost your device or forgot the password of the account. For the first method of Elude FRP, you will need a USB drive, an OTG cable, and a PC. Once you have these requirements, follow these steps: FRP bypass with OTG first, you will have to download FRP bypass APK from our official website. You can check the discharge link above. Once you have downloaded the file, copy the FRP bypass APK on your USB drive. Now start your Android device in which FRP problem faces. Then, a configuration assistant will be opened where you need to follow the basic instructions. Once the screen of From reset of the bypass factory you will have to enter the beginning credentials of the Google account. But because of the reason why you lost your phone or you do not remember it, you will have to try something else. Now using an OTG cable, you need to connect a USB drive to your Android device. Then you will see the opening of File Explorer on your Android phone. Next, open the folder on your Android device, where you have saved the APK file to bypass FRP. During the installation process, your phone will block the installation and you may see an error of unknown origin. Simply go to your device's settings and turn on the unknown fonts option. Now tap the install button again to start the installation process. Once the installation is complete, tap Open and it will open the Settings menu. In Settings scroll down, select the option to backup and restart. Then tap the factory data reset and tap the Confirm button. That's it! You've successfully gone Google factory reset protection on your Android device. Now you will need to restart your device and will no longer face FRP Oypass Isseme. After you restart your device, it's your choice to add a Google account or skip it. FRP Bypass Apk Requirements Android device executor Lollipop or above the Android version. Work Internet connection to download the required files. Windows PC How to skip Google factory reset protection without OTG The first method we shared above requires an OTG cable along with the APK file of Google factory reset protection. But with this method, you don't need to use OTG. Because we will be using the FRP Bypass tool, so make sure you have a working internet connection. So let's start: first, you must turn on your Android device. You will see a configuration wizard. Follow the on-screen instructions once you see the FRP Bypass tool screen programs. You will have to open your keyboard and tap on your settings. Next, you must tap the button and then the Help and Feedback button. Next, you must write what you want to write and choose the "Chare" option. After that, choose the messaging option, then the new message, and type any number in the "A" section. Next, choose it and tap the Contacts icon. Next tap on call the button icon and click on the new call option. Once the dialpad is opened, you will need to type *##4636##* Now click the Usage Statistics option and click the Back button. Next, you will go to the configuration menu. Next, you will have to click on the backup and restart option. Select factory data reset and confirm. That's it, guys!! You have successfully circumvented the verification of google accounts using the FRP bypass tool. The screenshots of this guide are attached to make it easier for you to follow these steps. I hope these two methods helped you clear up your doubts about how to circumvent the google factory restoration protection. Custom Binary Lock by FRP Fix When a user routes the Samsung device, a custom binary lock is automatically applied. This means that by default FRP bypass is activated. So your access to personalized phone recovery is also blocked. If you are facing this problem, then you need to follow the instructions given below. Make sure you have Odin 3 downloaded and working on PC. Next, follow these steps: First, you need to download the tool from here. After that unzip and install it. Next, you will have to choose your Samsung device and hold the home button, power button, and volume keys. You will then receive a notification of a system software update. Giving up the option of software updates, you will have to keep the volume up key. Now open the Odin 3 tool and connect your Samsung device to your PC. Once the device is detected automatically, then you will have to select the zip files from the file that you downloaded above. Next tap on the start button and update the software version of the started. Once the process is finished, you must disconnect the device and restart it. Please note, let your system upgrade install the necessary hardware, so wait a few minutes. Using this method, you will be able to unlock the bypass factory reset protection lock. That's it! Now your custom frp binary locking problem is fully solved. List of FRP Bypass Tools Let's take a look at the and better bypass FRP 2018 tools ready.
