Pdf a pages

Getting files from Drive Getting files from Dropbox Uploading file 0 of 0 Time left - seconds - Upload speed - MB/S Organizing PDFs... Woops! Something is wrong with your Internet connection... Download Article Learn how to save one or more pages from any PDF for free Download Article Do you have a large PDF file with only a few pages of information you need? Luckily, you can extract certain pages for free using built-in features in Google Chrome and your computer, or you can use Adobe Acrobat. Here's how to extract pages from a PDF document to create a new PDF document on your Windows or Mac computer. To create a new PDF from extracted pages, open a PDF in Google Chrome and click the Print icon. Select Save as PDF for the Destination drop-down menu. Select Custom for the Pages drop-down menu, specify the pages you want, and then click Save. 1 Open the PDF file in Google Chrome. If Google Chrome isn't your default PDF viewer, right-click (or Command-click) the file, click Open with, and then select Google Chrome. 2 Click the Print icon. This is in the top-right corner of the page. A printing menu will open. Advertisement 3 Set "Destination" as Save as PDF. Click the drop-down menu to see more options. If you have other printers connected, you'll also see them here. 4 Set "Pages" as Custom. Click the drop-down menu to see more options. By default, this will be preset to All. Alternatively, you can select Odd pages only or Even pages only. 5 Specify the pages you want to save. You only need to include the pages you want to keep; don't include the pages you want to remove. For example, to keep all pages except 4, 6, 7, 8, 9, and 13 from a 20-page document, enter the following: 6 Click Save. This is the blue button at the bottom. A pop-up window will open. 7 Select a save location and click Save. For some devices, the default location may be set to the Downloads folder. The new PDF will be saved to your computer. Advertisement 1 Open the PDF file. By default, it should open in your preferred browser. You can use Windows' built-in Microsoft Print to PDF feature to extract pages from a document. 2 Press Ctrl+P. This will open the Print menu. 3 Click the "Destination" drop-down menu. You'll see a list of available printers and other destinations. 4 Click Microsoft Print to PDF. This will be listed in the drop-down menu. If you don't see this option, do the following to enable it: Open the Start menu. Type "turn windows features on or off". Click the first option. Check the box next to Microsoft Print to PDF. Click OK. 5 Set "Pages" as Custom. Click the drop-down menu to see more options. By default, this will be preset to All. Alternatively, you can select Current, Odd, or Even. 6 Specify the pages you want to save. You only need to include the pages you want to keep; don't include the pages you want to remove. For example, to keep all pages except 4, 6, 7, 8, 9, and 13 from a 20-page document, enter the following: 7 Click Print. This is the button at the bottom of the screen. A new window will open. 8 Select a save location and click Save. The new PDF will be saved to your computer. Advertisement 1 Open the PDF file. By default, it should open in the Preview app.[1] 2 Press **⌘** Command+P. This will open the Print menu. 3 Set "Pages" as Selected Pages in Sidebar. By default, this will be preset to All. Alternatively, you can select Single or Range. 4 Select the pages you want to keep. Click the thumbnails in the sidebar to select them. If you don't want a page in the new saved document, make sure it's deselected. 5 Click the down arrow next to "PDF". This is towards the bottom of the menu. You'll see a list of options. 6 Select Save as PDF. This will be listed in the drop-down menu. 7 Edit the information (optional). You can change the title, author, subject, and keywords if necessary. To change the location, click the Where drop-down menu and select a new location. 8 Click Save. The new PDF file will be saved. You can also enter information such as the Title, Subject, and Keywords to make the file easier to find later. Advertisement 1 Open Adobe Acrobat. This is a paid program that allows you to extract pages from a PDF.[2] This feature is not available in the free version of Adobe Acrobat (Reader). 2 Click the Organize Pages tool. You can find this in the right toolbar or the Tools menu. 3 Click Select a File. A pop-up window will open. 4 Open the PDF you want to edit. Use the pop-up window to find the file, then click Open. 5 Click Extract. This is at the top of the page. 6 Select the pages you want to extract. When you click a page, it will be highlighted. 7 Click Extract. This is the blue button at the top. 8 Save the new PDF. The new pages will open in a new tab. To save it as a new document, go to File and click Save As. Select a save location. The new PDF will be saved to your computer.
