Cervical Screening Guidelines
For Nonpregnant and Laboring

Screening Recommendations	Clinical Management Recommendations														
Screening Initiation - Age 20 All sexually active women should have cervical screening at age 20 years. For women under 20 years of age, a Pap test should be performed only if there is a history of abnormal Pap tests. Women who have never had an HPV test should follow the same routine screening.	Diagnosis <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th style="background-color: #e0e0e0;">Diagnosis</th> <th style="background-color: #e0e0e0;">Events</th> </tr> <tr> <td>Positive</td> <td>Repeat Pap test in 3 months. If negative, repeat Pap test in 6 months. If positive, repeat Pap test in 3 months.</td> </tr> <tr> <td>Unsatisfactory</td> <td>Repeat Pap within 3 months.</td> </tr> </table>	Diagnosis	Events	Positive	Repeat Pap test in 3 months. If negative, repeat Pap test in 6 months. If positive, repeat Pap test in 3 months.	Unsatisfactory	Repeat Pap within 3 months.								
Diagnosis	Events														
Positive	Repeat Pap test in 3 months. If negative, repeat Pap test in 6 months. If positive, repeat Pap test in 3 months.														
Unsatisfactory	Repeat Pap within 3 months.														
Routine Screening - Age 20-29 years Screen annually with either a 3 consecutive negative Pap tests, then extend interval to every three years.	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th style="background-color: #e0e0e0;">Diagnosis</th> <th style="background-color: #e0e0e0;">Events</th> </tr> <tr> <td>ASCUS + 20 or + 30yr or + 30yr with no HPV status</td> <td>Repeat Pap in 6 months.</td> </tr> <tr> <td>ASCUS + 30 yr HPV -</td> <td>Repeat as a negative result.</td> </tr> <tr> <td>ASCUS + 30 yr HPV +</td> <td>Colposcopy within 6 months.</td> </tr> <tr> <td>ASCUS + 30 yr HPV +</td> <td>Colposcopy within 3 months.</td> </tr> <tr> <td>ASCUS + LMS/L, HSIL, CIN, AIS, or AI</td> <td>Colposcopy.</td> </tr> <tr> <td>LAI</td> <td>If not LMS following negative routine screening, repeat Pap in 6 months; all others go to colposcopy.</td> </tr> </table>	Diagnosis	Events	ASCUS + 20 or + 30yr or + 30yr with no HPV status	Repeat Pap in 6 months.	ASCUS + 30 yr HPV -	Repeat as a negative result.	ASCUS + 30 yr HPV +	Colposcopy within 6 months.	ASCUS + 30 yr HPV +	Colposcopy within 3 months.	ASCUS + LMS/L, HSIL, CIN, AIS, or AI	Colposcopy.	LAI	If not LMS following negative routine screening, repeat Pap in 6 months; all others go to colposcopy.
Diagnosis	Events														
ASCUS + 20 or + 30yr or + 30yr with no HPV status	Repeat Pap in 6 months.														
ASCUS + 30 yr HPV -	Repeat as a negative result.														
ASCUS + 30 yr HPV +	Colposcopy within 6 months.														
ASCUS + 30 yr HPV +	Colposcopy within 3 months.														
ASCUS + LMS/L, HSIL, CIN, AIS, or AI	Colposcopy.														
LAI	If not LMS following negative routine screening, repeat Pap in 6 months; all others go to colposcopy.														
Screening Cessation - Age 70 years Screened and documented for average risk 10 years within the last 10 years and no history of abnormal Pap tests. For women with three or more consecutive negative Pap tests, they should have three consecutive normal Pap tests before stopping screening.	Subsequent Management <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th style="background-color: #e0e0e0;">Diagnosis</th> <th style="background-color: #e0e0e0;">Events</th> </tr> <tr> <td>ASCUS + 30 yr HPV -</td> <td>Annual screening.</td> </tr> <tr> <td>ASCUS with no HPV result, followed by a negative</td> <td>Routine screening.</td> </tr> <tr> <td>ASCUS with no HPV result, followed by a positive</td> <td>Repeat Pap test in 3 months.</td> </tr> </table>	Diagnosis	Events	ASCUS + 30 yr HPV -	Annual screening.	ASCUS with no HPV result, followed by a negative	Routine screening.	ASCUS with no HPV result, followed by a positive	Repeat Pap test in 3 months.						
Diagnosis	Events														
ASCUS + 30 yr HPV -	Annual screening.														
ASCUS with no HPV result, followed by a negative	Routine screening.														
ASCUS with no HPV result, followed by a positive	Repeat Pap test in 3 months.														
Annual Screening Screen with previous history of abnormal Pap tests: <ul style="list-style-type: none"> > ASCUS, repeat with an immediate colposcopy. HSIL positive, or have ILS repeat in 6 months. 	Special Circumstances <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th style="background-color: #e0e0e0;">Diagnosis</th> <th style="background-color: #e0e0e0;">Events</th> </tr> <tr> <td>None</td> <td>Both total, no abnormal history - routine screening.</td> </tr> <tr> <td>None</td> <td>Both total, abnormal history - annual screening.</td> </tr> <tr> <td>None</td> <td>Total, no abnormal history or total negative - repeat Pap test in 3 months as part of comprehensive reproductive health assessment.</td> </tr> <tr> <td>Positive</td> <td>The result should not be used as evidence after 1 year in women of pregnancy. Repeat Pap test as available when ordering supplies.</td> </tr> </table>	Diagnosis	Events	None	Both total, no abnormal history - routine screening.	None	Both total, abnormal history - annual screening.	None	Total, no abnormal history or total negative - repeat Pap test in 3 months as part of comprehensive reproductive health assessment.	Positive	The result should not be used as evidence after 1 year in women of pregnancy. Repeat Pap test as available when ordering supplies.				
Diagnosis	Events														
None	Both total, no abnormal history - routine screening.														
None	Both total, abnormal history - annual screening.														
None	Total, no abnormal history or total negative - repeat Pap test in 3 months as part of comprehensive reproductive health assessment.														
Positive	The result should not be used as evidence after 1 year in women of pregnancy. Repeat Pap test as available when ordering supplies.														

ASCUS - Atypical Squamous Cells of Undetermined Significance
 ASC-H - Atypical Squamous Cells Cannot Exclude HSIL
 LMS - Low-Grade Squamous Metaplasia
 LHS - Low-Grade Squamous Lesion
 HSIL - High-Grade Squamous Intraepithelial Lesion
 AIS - Atypical Intraepithelial Lesion
 AI - Atypical Intraepithelial Lesion
 CIN - Cervical Intraepithelial Neoplasia
 AIS - Atypical Intraepithelial Lesion
 AI - Atypical Intraepithelial Lesion
