[paraphrased text here](#) This worksheet is themed around an alien visitor. Students will read the questions and choose the homophone that best completes each sentence. Then they will practice writing sentences of their own with commonly confused homophones. Are you still looking for word choice practice? This worksheet contains another 25 problems. Students examine groups of homophones and choose the best one that completes each sentence. Then students write their own sentences. This worksheet is themed around an underwater adventure. I hope that your students enjoy this one. Your word choices will send your readers in different directions. Homophones are words that sound the same but have different meanings and spellings, making them a key aspect of language learning. Understanding homophones can sometimes be challenging for students, but there are many fun and easy activities that can help. Homo Homo means same, as in homosexual: a person attracted to members of the same sex. Phone Phone means sound, as in telephone: to sound across. Homophones are words that sound the same but have different spellings. Examples: hear and here. Hear refers to the act of perceiving sound. Here describes a location or position. Nym Nym means name, as in pseudonym: a fake name. Homonyms are words that have the same sound and the spelling, but different meanings. Examples: ear and ear. One refers to an ear of corn, the other to a human organ responsible for hearing. Graph Graph means writing, as in biography: life writing. Homographs are words that have the same spelling, but different meanings and different pronunciations. Examples: wind and wind. One refers to a blowing breeze, while the other refers to the act of turning a crank. Looking for ways to make homophone learning fun? Start by creating a list of word pairs on the board and setting the timer. Students will then work together to find as many additional homophones as possible within the time limit. Another approach is to play Homophone Taboo, where students have to describe their chosen pair without using certain keywords or its counterpart. To take it up a notch, ask students to write a story that incorporates at least five pairs of homophones and demonstrates proper usage in context.
