With the recent increase in demand for technological know-how, telecommuting has become the norm, which is commonly used by several corporate employers. This means that if your job requires and involves sitting in front of a computer screen, it is very likely that you can do this work from the comfort of your own home.

Canadian employers value the quality of skills they can attract by allowing their employees to work in a more comfortable and productive environment than forcing them to work boring nine-to-five jobs. The majority of people working in Canada's technology and IT industries are immigrants, primarily from Asia and Africa. If you want to fulfill your dreams in Canada, moving to Canada is perfect for your career in technology and IT. IT and the IT industry is the largest and most important area of telecommuting in Canada. Due to the nature of work, it is more beneficial for employers and employees to work from home. The good thing is that Canada is one of the pioneers of this new employment model. To that end, we'll take a look at remote engineering positions in Canada and the salary ranges for each of these positions. Technical Jobs for Remote Workers in Canada 1. Virtual Assistant A virtual assistant is a professional, independent contractor who provides administrative services to clients for an agreed fee while working away from the client's office. Some of the administrative services you will perform as a virtual assistant may include: Answering emails letters and phone calls; scheduling meetings; booking travel and accommodation; managing your contact list; employee administrative requests; - providing customer service as the first contact person; in-depth knowledge of social media and Given the recent demand for tech experts, home work has become the rule that many employers adopt mostly when they meet several companies. This means that if your work requires and implies that you are seated in front of a computer screen, it is very likely that the work can be done comfortably from home. Canadian employers recognize the quality of the skills they can attract, allowing employees to work in a more comfortable and beneficial environment to make them productive than to force them to inspire a lack of nine - five forgotten. Many people working in the technology and computer sector are mainly immigrants from Asia and Africa. Immigrating in Canada is really your technology and your career if you want to make your dreams come true in Canada. The technology and computer industry is the main and most important area of remote work in Canada. Due to the nature of the employment, the employer and the work of employees are more of a home advantage. What is good is that Canada is one of the first to accept this new work model. To this end, we will examine the remote technological jobs that can be found in Canada and the salary scale for each of these jobs. Technological jobs that you can find in Canada for remote workers 1. Virtual assistant A virtual assistant is a professional and independent entrepreneur offering administrative services to its customers at a price agreed outside the customer's office. Some of the administrative services that will be executed as a virtual assistant may include: respond to emails and telephone calls that will link travel and accommodation locations that control contacts with customers who keep online records, are in accordance with internet data calculations. Calendars that the administrative problems of employees carry out customer service as the first point of contact with in -depth knowledge of social media Platforms like Excel and Word need to be effective as a virtual assistant. The site is generally very interactive and requires connecting with customers face-to-face and through social media. People with solid marketing structures are often best suited for these positions. Starting wages are typically between \$1,000 and \$1,500 per month, but as you gain more experience, you will earn more. 2. Online learning designer designers are responsible for creating virtual educational programs for students. Online learning designers also need to decide the right support for specific information and the correct delivery of the educational material. Learning experience with the students. Online learning designers conduct their operations in the technology department of a school or university company.

Although skills such as communication, listening, empathy and problems are necessary as online learning designers, they also need to work with trainers and subjects in the educational material to deliver the education of the sector with a tremendous transition to the entire sector exceptionally Canadian schools are creating more and more online - Documents to ensure students maintain the level of education and that schools around the world remain competitive in Canada. According to Glassdoor, the average wages for online educational designers in Canada are \$67,176 per year.

3. Web Angular Web Angular Web developers are qualified JavaScript developers who are knowledgeable about the theoretical concepts of software engineering. The corner developers of the website are obliged to develop different skills and use them at the right time and place for development and promotion. Success as a corner site Here are the main skills you will need: Node (npm) Package Manager Angular CLI (Command Line Interface) HTML and CSS Angular TypeScript RxJS Git Empathy Good English skills are also required as there is no need to explain technical solutions to developers. Entry-level workers in Canada earn about \$7,080 per month, while experienced workers earn an average of at least \$12,000 per month. 4. Project Managers Project managers are responsible for the planning, execution, monitoring, control and completion of each project. To pursue a project management career in Canada, individuals must have: Bachelor's degree in management or economics. Project Management Certificate. Master's degree in Project Management or Business Administration. Certified Associate Degree in Project Management. Relevant industry experience over a long period of time. There are many responsibilities involved in remote IT and technology project management. In such cases, project managers prefer to be in the office because it is much easier for them to communicate with employees. However, as more skilled workers are hired, the ability to effectively manage projects online is becoming more and more in demand. The average annual salary for a project manager in Canada is \$81,652 and \$41.87 per hour. Entry-level positions earn a minimum of \$62,490 per year, while more experienced project managers earn up to \$122,400 per year. 5. Graphic Designer UI/UX UI/UX stands for User Interface/User Experience. UI/UX designers are tasked with creating products for the sole purpose of satisfying the user. Their main goal is to find new ways to improve the experience of using a product to make it faster, lighter or easier to use. User interface and graphic design for web, mobile and marketing are in high demand in Canada. Toronto and Vancouver. UX designers can find work in different sectors such as: entertainment, education, bank, fashion, restaurant, etc. The number of graphs is limited and therefore gains very good wages. The average time is approximately \$ 40 and \$ 6500 per month. The benefits of remote work in all their consequences are guaranteed by remote work elasticity and independence of employees. Working from home was more advantageous for both employers and employees; The employee can take advantage of the work and private balance of life provided by homework because it prevents the blurred boundaries between work and private life, which is the lack of results in these technologies.

Therefore, maintaining a healthy working life is a priority for many employees. The ability to balance these two worlds has become important for employees to make them feel happier. Although most employees are more productive without close supervision of employers, work from home and provides them with the required freedom. The remote work also saves time spent on long journeys at work and keeps stressful employees. Employees can also save money that has been spent on transport and other employment costs.
