Sketch Mobile utilizes multi-touch capabilities for collaborative works of art, allowing multiple people to paint on the same device simultaneously. There are four primary types of tools: Click (1 finger), Brushes (1+ finger), Shapes (2 fingers), and Brushes (2+ finger). The "Floodfill" tool fills the screen with one click using a single-finger input. Brushes allow for multi-finger painting, creating fun new twists. Shapes include Circle, Square, Polygon, Gears, Star, Burst, Radial Burst, Spiral, and Supershape. Included in Sketch Mobile is the Power nib on top left-hand side of the screen, which serves as a gateway to configuring Sketch Mobile. The Power nib can be tapped once to enter the Tool builder or held to access gesture-based commands. Presets are customizable and can be accessed through the Power nib terminal. The Tool builder features five preset buttons and an array of options with multiple blending modes, colors, gradients, and tool-specific options. Sketch Mobile: A Versatile Drawing Tool for Creatives Sketch Mobile comes under various licensing, with Sketch being available for schools and educational resources under the Creative Commons BY-NC 3.0 license. Mr. Doob's harmony tools, including Web, Shader, Fur, Sketchy, and Chrome, are available under the MIT License. Sketchpad makes it super easy to turn your ideas into real-life masterpieces. Whether you're sketching, editing photos or designing a business card, Sketchpad's got you covered. Create some sick social media posts with its rad digital makerspace features, like drag-and-drop photo edits and customizable brushes. You can even share reloadable templates with friends, classmates or colleagues! Get creative with the Tile, Mirror, Crayon, and Calligraphy brushes to add some cool strokes to your artwork. Decorate it with hundreds of high-quality stamps and use the line and path tools to create detailed line art. If you're feeling stuck, browse through thousands of open-source vector images that are perfect for commercial or professional projects. Add your own images by simply dragging and dropping them into the interface - easy peasy! Each shape can be customized with slider options, so go wild and experiment! You can even add fill and outlines with colors, gradients and patterns to make it look like a pro did it. Paint directly inside shapes to keep those brushstrokes looking neat and tidy. And if you need some font inspiration, access Google's entire library of high-quality fonts right from within Sketchpad. Plus, text automatically scales to fit your design, so just drag the corners to resize it. When you're all done, save it safely in your Documents folder - autosave is enabled by default, so you'll never lose a file. And don't worry if you need to use Sketchpad on-the-go - it's available on Mac, PC, Chromebook, Linux, iPad and Android tablets, plus any browser. If you're offline, you can still access some of its features, but with a limited asset collection. When you purchase Sketchpad for just \$4.95, you get full access to the desktop app on all your devices, plus Premium updates, lesson plans and monthly newsletters for a year. You'll also be able to export your masterpieces in popular formats like PNG, JPEG, PDF and even a reloadable SKETCHPAD file. And if you change your mind or want to try something new, don't worry - your purchase is a one-time charge, and you can always request a full refund within 30 days of buying Sketchpad.
