The pulmonary circulation

The PULMONARY circulation is LOW PRESSURE

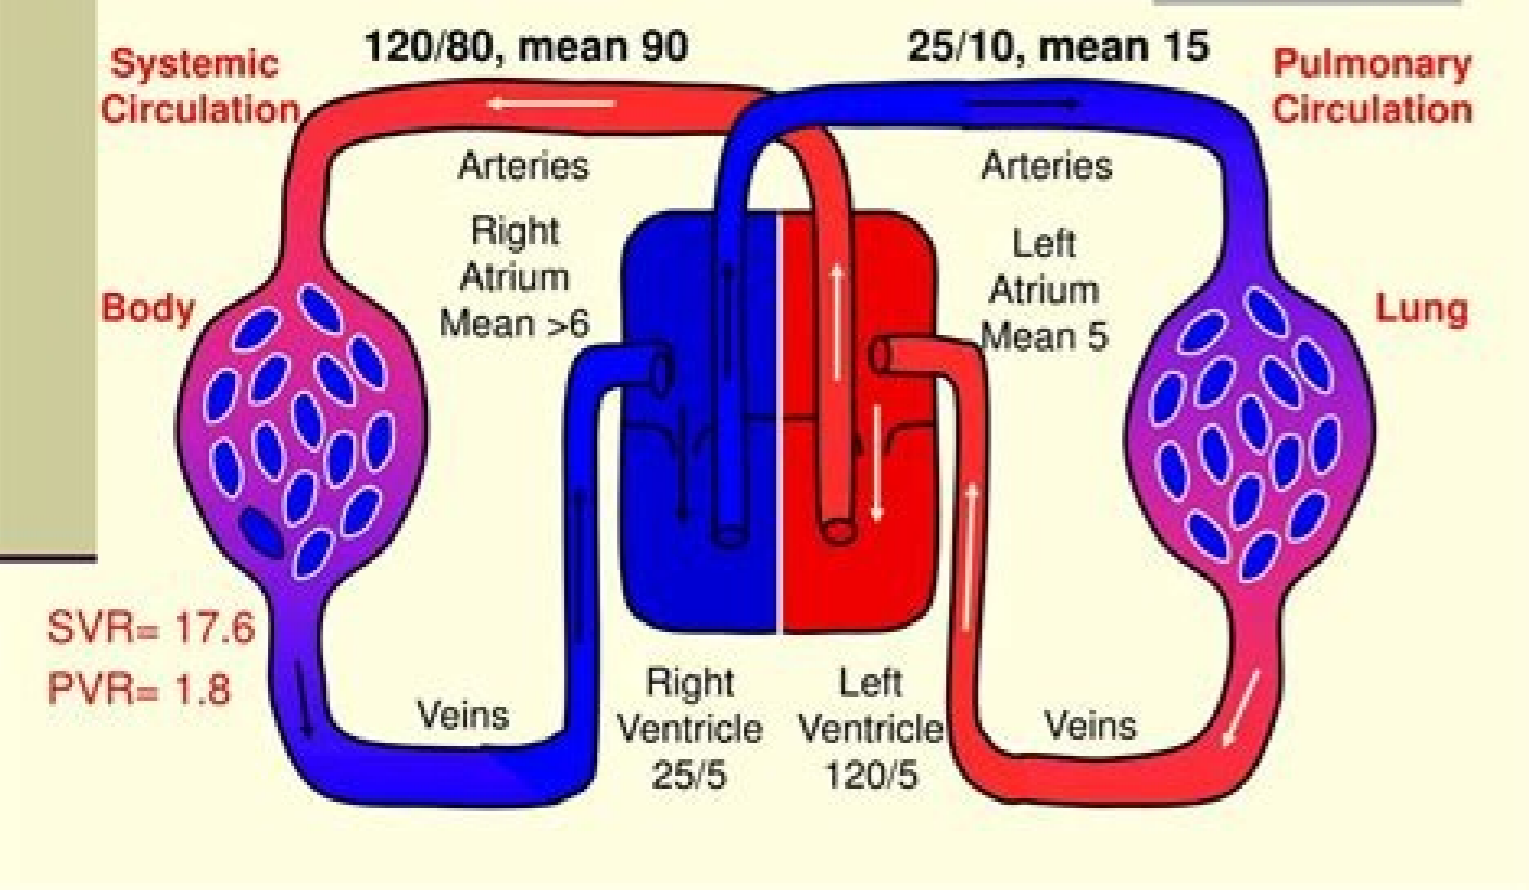

Systemic Circulation

Structural Differences between the Left & the Right Ventricle:

- Left Ventricle**
 - Thick myocardium wall -> more pressure
- Right Ventricle**
 - Thin myocardium wall -> less pressure

Vascular Pressure in Systemic and Pulmonary Circulations (mm Hg)

Overview of Pulmonary Circulation

Deoxygenated blood

- Under resting conditions, 5 liters of deoxygenated blood are pumped to the lungs each minute from the right ventricle
- CO₂ blood concentration is higher than O₂ blood concentration in:
 - Systemic veins
 - Right atrium
 - Right ventricle
 - Pulmonary arteries

Systemic and pulmonary circulation ppt.

1- Right ventricle: 25-1 mmHg 2- pulm. Artery: 25-8 mmHg 3- pulm. Vein: 10-12 mmHg 4- The bronchial arteries originate from the systemic circulation (transport 1-2% CO₂-oxygenated blood) and then empty in the pulmonary veins and then to the left surface so that the left ventricle pumps 1-2% more than the right ventricle. > Alveol. The blood moves from the aorta through the systemic arteries, then to the arterioles and the capillary beds that supply fabrics of the body. (The difference of hydrostatic pressure is 15 mmHg between the heart level and the PLUMPE of the lung) 5- If the person is lying down or exercising, you can only see the area 3. Safety factors 1- 21 mmHg in acute states 2- 35 mmHg in chronic cases 22 Heart failure and formation of pulmonary edema 23 Causes of pulmonary edema 24 Causes of pulmonary edema Safety factor Given of heart failure Pulmonary blood cover membrane, as in pneumonia or breathing Gas of chlorine or negative gas dioxide Negative interstitial pressure Lymphatic pressure Decrease in the interstitial osmotic pressure of 24 Pleural (EDEMA): Free Large Liquid Collection in Lock Pleural Space 1 of Lymphatic Drainage of Pleural Space 2- Cardiac Fault (Increase in the pressure of the lid) 3- Decrease the osmotic pressure of the plasma colloid 4- Infection or inflammation of the surface of the Pleural cavity The pulmonary trunk is divided into the right and left pulmonary arteries. PR. 14 mmHg 8 mmHg Interest. OSM 5, Carazon enhances both types of circulation, the heart pumps are adjusted to the oxygenated blood of the left ventricle and in the aorta to begin the systemic circulation. The Siphetic Loop goes all over the body in the loop ed ed osecorp le atilicaf ranomlup n'Aicalucric al .paC gHmm 7. E' A' ranomlup ralipac ed sacimjAnid 61. 1. opreuc led ednarg sjAm airetra al .atroa al ed s@Avart a n'Azaroc led odreuzgi olucArtnev le edsed aebmob es adanegxo ergnas al Breathing: Deoxygenated blood flows into the lungs. The heart pumping boosts this flow of blood through the arteries, capillaries and veins. Neg. -8 mmHg -3 mmHg 17 18 Pulmonary capillary Pulmonary capillary pressure Osmotic pressure Interstitial 14 mmHg Negative interstitial pressure 8 mmHg mmHg Total mmHg osmotic pressure osmotic pressure mmHg Net filter pressure MMHG Interstitial pressure Negative Hair pulmonary dynamichydrostatic + 7 -8 -8 surface tension Osmotic hydrostatic pressure 28 14 NET +1 -5 Lymphatic pump 20 21 Pulmonary edema Alvs are always dried, except for a small A quantity of secreted liquid by alveolar cells on the alveolar surface. The pulmonary arteries are the only arteries that carry deoxygen blood, and the pulmonary veins are the only veins that transport oxygenated blood. A set of blood vessels circulates blood through the lungs for the exchange of gases. Send blood oxygenated to the cells and returns deoxygen blood to the heart. Then, the heart pumps it out of the right ventricity and in the pulmonary arteries to begin pulmonary circulation. The oxygenated blood then passes from the capillary beds through Velaires to the pulmonary veins. (Capil. There are two types of circulation: the pulmonary circulation and the systemic circulation, the pulmonary circulation moves the blood between the heart and the lungs. PR 2-Damages to the pulmonary capillary membrane caused by: A-infections Bilius of chlorine gas or sulfur dioxide gas. 2. The systemic circulation moves the blood between the heart and the rest of the body. The blood moves to the lungs, oxygen carbon dioxide exchange, and returns to the left aurupure: 8 mmHg 4- Left atrium and main veins: 2 mmHg Blood volume of the lungs : 450 ml (9% of the volume of blood 70 ml are found in the capillaries 3 4 5 volume of blood from the lungs, if the person is bleeding or blowing air just after ergnas al .ranomlup elcub IE .LLIHCACI DO wOLF OLB n'AgNIN :1 enoz-1 .Janoiger ranomlup ergnas ed ojulf 21 11 01 9 jobjabed gHmm 8 y n'Azaroc le erbos gHmm 51(gHmm 32 ed se etneidarg IE. Matching game, word search puzzle, and hangman also available. 17/03/2013 · Cardiopulmonary resuscitation ppt ... • Cardio Pulmonary Resuscitation is a technique of basic life support for oxygenating the brain and heart until appropriate. ... • To maintain breathing by external ventilation (B). • To maintain Blood ... Then the right ventricle contracts and the blood is pumped to the lungs through the pulmonary artery. In the lungs carbon dioxide is removed and oxygen is absorbed and the oxygenated blood again enters the left atrium and the process repeats. Since blood flows through the heart twice in one cycle, it is called double circulation. Lymph - is a colourless fluid present in intercellular ... 04/01/2019 · Cardio Pulmonary Resuscitation (CPR) CPR consists of measures for establishing and maintaining Airway, Initiate Breathing and Providing Adequate Circulation for Tissue Perfusion. Failure of Circulation for more than 3-4 minutes can lead to irreversible cerebral damage, therefore CPR must begin Quickly. 08/04/2014 · Anemia ppt 1. ANEMIA 2. Introduction Anemia is one of the most underdiagnosed conditions and, if left untreated, can have many serious implications such as cardiovascular disease and compromised immune functions 3. Introduction According to WHO estimates, India is one of the countries in the world that has highest prevalence of anemia. 08/03/2022 · Cardiology : Welcome to theheart.org | Medscape Cardiology, where you can peruse the latest medical news, commentary from clinician experts, major conference coverage, full-text journal articles ...
