Star Wars canon totals entire days of content that includes movies and shows both in and beyond the Skywalker saga. New Star Wars content has already been planned, and it will continue to add to an already extensive franchise runtime. The sheer length of Star Wars' canon movies and shows is a testament to both the galaxy's depth and the commitment of its fans. Star Wars is a massive, decades-long franchise that's put out a huge amount of content, and it would take an incredibly long time to watch every canon Star Wars movie and show. With over 47 years of storytelling, Star Wars has made a veritable empire of content with an enormous total runtime. Upcoming Star Wars movies and new Star Wars shows will certainly add to the total amount of time it takes to see everything the franchise has to offer, but as of writing, Star Wars is already incredibly long. There are several viewing orders for all the Star Wars movies and shows, but those plans don't always convey just how much of an undertaking seeing all of Star Wars really is. There are quite literally days worth of content in the franchise, and far more stories to be found in media beyond the movies and shows. Over the years, Star Wars has explored almost every corner of the galaxy far, far away, and it's taken quite a bit of time to show it all. Related Looking at all nine Skywalker Saga entries and three spinoffs, we crown the best Star Wars movie in our full ranking of the galaxy far, far away. 26 Star Wars The original Star Wars, which was later retitled A New Hope, has a fairly straightforward runtime, but it wasn't always that way. A New Hope, like the rest of the original trilogy, received several special editions and re-releases. Those special editions added different elements to the films, from including previously deleted scenes to extending existing ones and adding CGI, and they lengthened their runtimes. Since Disney+ only has the 4K remastered release available to stream, that version's runtime will be counted towards Star Wars' total. A New Hope Runtime With Credits 2 hours, 6 minutes Without Credits 2 hours Like A New Hope, The Empire Strikes Back has had its share of re-releases. Still, though, it is a rather straightforward calculation to see what its total runtime was. It's also interesting to note that The Empire Strikes Back is only two minutes longer than its predecessor, and had an additional extra minute of credits. The Empire Strikes Back Runtime With Credits 2 hours, 9 minutes Without Credits 2 hours, 2 minutes Return of the Jedi had quite a bit added to it in the special editions and re-releases. A large part of its additional runtime came from added celebrations after the destruction of the New Death Star. Those celebrations introduced prequel trilogy planets like Naboo and Coruscant two years before The Phantom Menace could do so itself. That also means Return of the Jedi contributed a few seconds to the percentage of Star Wars set on Coruscant. Return of the Jedi Runtime With Credits 2 hours, 17 minutes Without Credits 2 hours, 8 minutes After nearly 16 years, Star Wars finally brought a new original movie to theaters with Star Wars: Episode I - The Phantom Menace. As the first entry in the prequel trilogy, The Phantom Menace laid quite a bit of groundwork for what was to come, and it did so in about two hours and 10 minutes. It was a solid runtime that only slightly expanded upon the original trilogy's times, and The Phantom Menace used its time quite well. The Phantom Menace Runtime With Credits 2 hours, 18 minutes Without Credits 2 hours, 10 minutes The Phantom Menace's story was fairly small in scale, but Star Wars: Episode II - Attack of the Clones magnified that scale exponentially. Since it told the sprawling story of the beginning of the Clone Wars, Attack of the Clones featured the longest runtime in the prequel trilogy at over two hours and 15 minutes. Some viewers criticized Attack of the Clones for being "bloated" when it first released, but the amount of new lore it introduced to Star Wars made up for its lack of concision. Attack of the Clones Runtime With Credits 2 hours, 24 minutes Without Credits 2 hours, 16 minutes Star Wars: Episode III - Revenge of the Sith had to wrap the entire prequel trilogy up and connect cohesively to the original trilogy. That was a very tall order, and as a result, Revenge of the Sith was barely shorter than Attack of the Clones, as it featured a two hour and 14 minute runtime. Luckily, Revenge of the Sith moves so quickly and features so many converging story lines that there is hardly a second of that runtime that feels slow. Revenge of the Sith Runtime With Credits 2 hours, 22 minutes Without Credits 2 hours, 14 minutes An often forgotten Star Wars movie, the original The Clone Wars movie is often overshadowed by its far more successful series. The Clone Wars movie does still exist, though, and it contributed over 90 minutes of content to Star Wars' total runtime. It may be a forgotten addition to Star Wars canon, but without the Clone Wars movie, many of the best moments in the franchise would never have happened. The Clone Wars Movie Runtime With Credits 1 hour, 40 minutes Without Credits 1 hour, 34 minutes So far, calculating runtime for the Star Wars movies has been fairly straightforward. Star Wars: The Clone Wars, however presents a problem. With 133 episodes, seven seasons, and over two full days of content, The Clone Wars is massive, and simply subtracting the credits from each episode isn't feasible. Instead, the average length of credits, broken down by season, was subtracted from the official runtime displayed on Disney+. Even with that formula, The Clone Wars is far and away the longest Star Wars story ever told. The Clone Wars Runtime With Credits 2 days, 10 hours, 19 minutes Without Credits 2 days, 1 hour, 27 minutes Like The Clone Wars, Star Wars Rebels was a similarly difficult show to calculate the runtime of. With 75 episodes over four seasons, totaling over a day in runtime, Rebels is nearly as much of a behemoth as The Clone Wars was. That figure was calculated the same way as The Clone Wars was, although Rebels' runtime also includes the four shorts that accompany the series. Rebels Runtime With Credits 1 day, 6 hours, 20 minutes Without Credits 1 day, 3 hours, 44 minutes Disney purchased Star Wars from creator George Lucas in 2012, but the company wouldn't release its first movie in the franchise until 2015's Star Wars: The Force Awakens. In many ways, The Force Awakens was an homage to Star Wars' history. It even resembled the rest of the Skywalker saga's runtimes, though some viewers took exception to how many resemblances it had to the original trilogy. In the end, The Force Awakens added over two hours of runtime to Star Wars. The Force Awakens Runtime With Credits 2 hours, 22 minutes Without Credits 2 hours, 7 minutes Reddit and its partners use cookies and similar technologies to provide you with a better experience. How Long Would It Take To Watch All Star Wars Movies and Shows? The Star Wars franchise has captured the hearts of millions of fans worldwide since its inception in 1977. With a wide range of movies, TV shows, and animated series, it can be quite daunting for newcomers to dive into the vast Star Wars universe. One common question that arises is, "How long would it take to watch all Star Wars movies and shows?" In this article, we will break down the runtime of each installment and provide an estimate of the time required to complete the entire saga. 1. Star Wars: Episode IV - A New Hope (1977): The original Star Wars film has a runtime of approximately 2 hours and 1 minute. 2. Star Wars: Episode V - The Empire Strikes Back (1980): The second installment clocks in at around 2 hours and 4 minutes. 3. Star Wars: Episode VI - Return of the Jedi (1983): The final film of the original trilogy has a runtime of about 2 hours and 11 minutes. 4. Star Wars: Episode I - The Phantom Menace (1999): The prequel trilogy begins with a runtime of roughly 2 hours and 16 minutes. 5. Star Wars: Episode II - Attack of the Clones (2002): The second prequel film lasts for approximately 2 hours and 22 minutes. 6. Star Wars: Episode III - Revenge of the Sith (2005): The last installment of the prequel trilogy has a runtime of around 2 hours and 20 minutes. 7. Star Wars: Episode VII - The Force Awakens (2015): The sequel trilogy kicks off with a runtime of approximately 2 hours and 18 minutes. 8. Star Wars: Episode VIII - The Last Jedi (2017): The second film of the sequel trilogy lasts for about 2 hours and 32 minutes. 9. Star Wars: Episode IX - The Rise of Skywalker (2019): The final film of the Skywalker saga has a runtime of around 2 hours and 22 minutes. In addition to the main episodic films, there are standalone movies and TV shows that expand the Star Wars universe: 10. Rogue One: A Star Wars Story (2016): This standalone film has a runtime of about 2 hours and 13 minutes. 11. Solo: A Star Wars Story (2018): Another standalone movie that lasts for approximately 2 hours and 15 minutes. 12. Star Wars: The Clone Wars (2008-2020): This animated TV series consists of 7 seasons with a total runtime of approximately 32 hours and 13 minutes. 13. Star Wars Rebels (2014-2018): Another animated TV series with 4 seasons and a total runtime of around 33 hours and 43 minutes. 14. The Mandalorian (2019-present): This highly acclaimed TV series currently has 2 seasons, with each episode averaging around 30-40 minutes. As of now, the total runtime is approximately 14 hours and 36 minutes. Now, let's calculate the total time required to watch all Star Wars movies and shows: Episodic films: 2+2+2+2+2+2+2+2+2 = 18 hours and 22 minutes Standalone movies: 2+2 = 4 hours and 28 minutes TV series: 32+33+14 = 79 hours and 56 minutes Total: 18+22 + 4+28 + 79+56 = 102 hours and 46 minutes FAQs: 1.
