Players act as head of a military company and lead workers with superpowers to fight against In this article we will write about Counter: Side - Reroll, Tier List, Tips and Guides. In the KR version, we can get a good enough hero without rolling with 30 starter gacha reels available, but in case you still want to reroll -1. Sign up for our channel3. Install the Clone app and clone 5 game. If the reroll failed - delete the clone app6. Install the clone app again and follow from step 3 2. Create a new instance. 4. Bind guest account for social.1. Selective / Beginner calls (you get 30 at the beginning) to SSR Kyle Wong or any good waifu from Tier List. a. For SR, pull to Evelyn, she is the best curator b. Another top SR: Lin Xian, Sylvia and Kim Sobin2. SSR roller shell Yang Harim on his time-limited banner (the God-level support, it can summon, attack, debuff and shield)3. SSR Gaeun ticket choice (Gaeun is not available for the selector ticket, so select another person.) Only Yang Harim requires RNG and rerolling. Use only 1 of your selective call (forced), and then go to another banner to pull to Yang Harim. Once you've got Yang, go back to Selective/Beginner pulls for Kyle Wong and the SRs. Now let's check out the other Tier Lists. It is taken from a very good beginners guide. The characters outlined in green should be prioritized as they are very good, despite the rarity all the characters in the list are competent and viable.*SSR Character Seo Yoon outlined in white is given free at the end of the main story of chapter 1. She's decent. If the character you want to level is not in the list, feel free to level and play with them, it is a game after all and you should be able to play as you want, with whom you want without following a meta list, just make sure to read your skills descriptions (5the ability to unlock dramatically changes as the character plays). All characters and rarities have their niche of useway or another, along with a strategy combination. For example, you can build a team based on viable soldier who has units that Buff Buff also also the specific ship/cruiser that provides them with extra buffs.GuideGreat advice available - here.Important information from the beginner guide that I mentioned above.Download Counter: APKQ Side. This game © F2P/A. Yes, you only need the base character, the dupes only save you resources and time, which are all far-fable. The game also © give you the opportunity to win many pulls. The least rare and large are viable and large herds as well© as © ssr + piety rate?A. 3% SSR pull rate, 150 pulls guarantee you one of the banner characters highlighted in case you don't get them earlier. However, the track may have 2 characters and not be guaranteed© to get both if you have too much bad luck.Q. Should I save my premium coin?A. Yes, future SSR characters are very good, however grab Yang Harim during the launch range, if there is, as well as improve your overall list with lower rarity herds. Also©m gets 10 task planet points for every pull it does, which you must save and not buy extra pulls. With 1 month of play, you can buy an SSR operator directly from the store using 3,000 coins (300 pulls). Operators are cruise/ship operators that provide extra buffs. Warning: SEA will most likely be in an accelerated cauldron with new hero/banners every week. I can underline the importance of saving your currency if you are an F2P player, if you spend all your currency and summons to get to launch SSR characters that will most likely come off the banner later when they leave more powerful seeds, you will end up giving up the game if you are a PVP-focused player and want to stay competitive when new meta units change, you will end up launching weekly. Can I use an emulator to play the game?A. It should be taken into account that the game will have its own client for SEA in the launch, which you can download on your main website. For smoother gaming experiences and experiences, I suggest the PC client and play it there. MEmu +LD player is © if you plan to play or reconnect in the emulator for now. Bluestacks tend to break the game. CLIENT DOWNLOAD PC from your FACEBOOK page. Is this © a main or side game? A. The game will be the main game until© you unlock and catch with all your characters and features, and then it becomes a side game with many events and content added over time. The main focus © also be the fun live PVP that the game has if you enjoy something more competitive. Q. Does the game have self-battle? The Baa160A. Yes, it will darken/darken your screen to save energy, but it will still work in real time in the background. Q. How long does it take to make all the daisies? A Rayna160Q. Should I re-roll to extra SSR characters on launch, since Weja Aham is getting 7x10 pulls each day for a week and 10x call of the pre-registration number? A Baa160A;A. I would personally advise against this, but if you want© to grab someone i would recommend in catching Yang Harim. Support whoever you are and still be useful for final incursions/bosses/buffs/guild healing, even in the KR © now. If you're in the case of a case of money, save tickets for better tracks.
