New Herunterladen Guide Apps Find Gadgets of the Play Store app. Information on downloading apps. Do you know more about how you need it? If you think of Google apps, imagine programs such as Gmail, YouTube, Google Maps and Google Assistant. These programs are so popular that it looks like part of Android. If you visit the Google LLC Play store page, you will find many applications there. However, there are some real hidden jewels in this ocean. The developers of Google programs have been busy experimenting with many unique ideas for many years. There are many useful programs that do not cover the best time. So let's take a look at some of these unhealed heroes. 1. Socratic by Google 3 pictures of Sokratic by Google are based on an educational program. Imagine you are in a mathematical task. After you have entered the entire question into the Google system, you will seek help immediately. Normal? Socratic is useful here. With this intelligent gadget you can scan this problem and get solutions from the best sources. It was specially developed with Google algorithms for universities, universities and universities. You will also find videos on various topics with a uniform explanation of processes and methods. Thanks to the language assistance function, Sokratic enables you to ask every question during the conversation. Sokratic works with teachers and experts to give you visual explanations for every topic so that you can learn the concepts of any problem. He currently works in algebra, geometry, trigonometry, biology, chemistry, physics, history and literature. The program will offer other topics in the future. Download: Sokratic from Google (free) 3 Images Scanning is an extension of Google Photo. This is a scanner program for old printed photos. The program is simple. Simply move the mouse over the picture and move it as stated by the program. The program analyzes, combines and improves the photo. The results are surprisingly good. It would be a mistake to assume that Photoscan works as well as a physical scanner or a professional service. But as a program it is one of the best. The program uses the AI from Google to calm colors and remove reflections. HeAutomatically encrypts photos, detecting the edges and has the features of straightening or rotating images. You can also automatically copy all scanned images directly to Google photos. Download: Photoscan by Google Photos (free) 3 GRASSHOPPER Pictures is an educational Google application for learning coding in a funny way. Grasshopper offers various fun games and challenges with increasingly difficult levels to improve your skills. Then you can go from basic to a higher level, using visual puzzles and solving problems. JavaScript, which is an industry standard, are just a few clicks in this application. Provides real-time reviews and helpful instructions. It also has a system of achievements and awards that encourages you to stay consistent in science. After completing all levels, Google will issue a certificate and you can finally start your professional career. Download: Grasshopper (free) 3 Image Reading is a reading application for children from the age of five. Its main function is to make reading more interactive and interesting for children and to encourage yourself to learn. It helps them improve the ability to read in English and eight other languages. It has a collection of interesting stories and tokens/achievements with the Virtual Assistant Dia, which associates children. It is an application for children, so it is safe for them. In addition, there are no ads and also works offline. You can optimize its content depending on the degree of difficulty. It also has a multiple support function, thanks to which many children use the same application and create an individual profile for their progress. The program recommends books for each child based on their reading and level skills. Download: Read from Google (free) 3 Crowdsourcing images is an interactive application that helps Google update artificial intelligence technology. You can use your skills, such as recognizing the object based on the image or sound of a specific bird to help Google improve your artificial intelligence system. In return, you will receive many benefits. You can get badges and receive Google's recognition for your contribution. It also gives the opportunity to join Hangout with Google experts and other co-creators to improve the Google ecosystem and its products. You can provide services such as checking image labels, perception of images, translation, checking the correctness of translation, recognition of handwriting, mood detectionAnd more. Download: CrowdSource (free) 3 images Google Arts & Culture is a great program for art and history lovers. It summarizes the stories and knowledge of more than 2,000 cultural institutions from 80 countries. It has some great features like Art Selfie where you can explore similar portraits, 360 degree videos and virtual reality tours for panoramic travel to your favorite places, street view to explore famous landmarks and places, and more. Another great feature is the "Eye Time and Colors" where you can travel in time and see art and rainbows. There are also museums and exhibits nearby. This program offers exceptional digital experience and spiritual interest from all over the world. Download: Google Arts and Culture (Free) 2 images are some remote Android views. Some are charges, others are free but limited. Chrome's remote desktop is a rare example that is completely free and fully functional. If you don't want to work with another application on your computer, you can install an extension in Chrome and access your computer from anywhere in the world using your android phone. The best part is that it works on your computer and not just Chrome. While your computer and Android devices are connecting to the internet, you can access your computer securely. Download: Chrome remote desktop (free) 3 images Google tasks is a task list that handles daily tasks and routine. Google's tasks are invisibly integrated with Google Calendar and Gmail so you can manage and complete your daily tasks, and you can edit, view and manage tasks from any device on the road. The task in the sidebar will also find a Google calendar. The program can quickly create tasks from your e-mail. It offers great task management features such as secondary tasks where the main task can be broken down into smaller, more achievements. Tasks and project rules can be effectively adjusted by adding a reminder date to any note. You can also add a checklist to any note to review a few project activities. Download: Google Tasks (Free) Of course, you are looking for the best ratings and downloads. However, sometimes it's worth trying instruments with medium numbers. The program may not be suitable for some people, but it may be necessary for you. So, check the Google apps above and discover more fun apps from the Play Store. Shopping centre.
